

TALHA RIAZ

SENIOR FULL-STACK DEVELOPER

PROFESSIONAL SUMMARY

Bhara Kahu, Islamabad, Pakistan | +92 318 585347 | talhariaz5425869@gmail.com | github.com/talhary | talhatech.vercel.app

Senior Full-Stack Developer with 2 years of experience building enterprise-grade Management Systems. Expert in Next.js, MERN stack, and React Redux. Proficient in Python (FastAPI), Golang, and databases (PostgreSQL/SQL, MongoDB). Robust data orchestration via Prisma, Drizzle ORM, and TanStack Query. Architecting scalable backends and cloud systems with AWS Fargate, EC2, ALB, ACM, and Docker.

WORK EXPERIENCE

Senior Software Engineer | Woltrio

2025 - PRESENT

- Building modern healthcare frontends with TanStack Start and shadcn/ui for premium user experiences.
- Implementing complex server-state management using TanStack Query (React Query) and Redux Toolkit with Prisma and Drizzle ORM.
- Architecting scalable backends with Golang, PostgreSQL, and AWS Fargate serverless containers.
- Configured ALB/Target Groups and managed SSL via AWS ACM for high-security healthcare traffic.
- Streamlined development cycles with GitHub Actions CI/CD and Docker Compose.

Software Engineer | Swismax

2024 - 2025

- Developed dashboards using React (MERN Stack) and Material UI (MUI), fetching data via GraphQL and REST APIs.
- Managed backend services on AWS EC2, writing optimized SQL queries, and transitioned PHP monoliths to containerized microservices.
- Built cross-platform mobile apps with React Native & Expo and automated testing via Puppeteer.

MANAGEMENT SYSTEMS & PROJECTS

Vine LMS (vinelms.com)

- LMS built with Next.js, Node.js/Express, and PostgreSQL, utilizing TanStack Query, Stripe Connect, Reader Pay, and Stripe Meter.
- Containerized via Docker & Docker Compose with custom routing via Cloudflare dynamic domains.

Healthcare EMR System

- EMR platform built with MERN stack. Utilized Redux for global state and AWS Fargate for scalable API endpoints with ACM encryption.

Anti-Bot Google Search Scraper

- Bypass/scraping engine built with React (Vite), Node.js (TS), and Python (FastAPI).
- Uses Puppeteer & SeleniumBase to extract organic search metrics and SGE AI Overviews.

Golang Distributed Chat System / Bridge

- High-concurrency chat server built using Golang, WebSockets, and Redis for real-time messaging.
- Configured AWS ALB and managed scaling via ECS Fargate and PostgreSQL database.

AI-Powered Code Assistant CLI

- CLI tool built in Go and Python integrating LLMs for automated code generation, search, and page rendering.
- Implemented custom caching and token-limiting optimization logic.

Cross-Platform Delivery Mobile App

- Dynamic mobile app built using React Native & Expo with global state management via Redux Toolkit.
- Automated build pipelines with Expo Application Services (EAS) and backend on Node.js/MongoDB.

Serverless Analytics Dashboard

- Serverless analytics web application built with Next.js, Tailwind CSS, AWS Lambda, DynamoDB, and Serverless Framework.

TECHNICAL SKILLS

FRONTEND/UI	BACKEND/DATABASE	AWS & CLOUD	DEVOPS/TOOLS
React, React Native Expo, TanStack Start, Redux, TanStack Query	FastAPI, MERN Stack	AWS Cloud, Fargate, EC2, ACM, S3, ALB	Docker

EDUCATION

BS in Mathematics

2021 - 2024

Quaid-e-Azam University, Islamabad

LANGUAGES

English: Proficient | Urdu: Native
